DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Applicant use the term, "ultrafine." The term ultrafine is a relative term. The Applicant is urge to further define and what is meant by ultrafine and quantify the term ultrafine.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by McCormick, III et al., US 2003/0199653 A1

(hereinafter "McCormick"). McCormick teaches transition metal nanoparticle with surface modified copolymers. See McCormick, Abstract; ¶¶ [0011] - [0016]. McCormick further teaches polymers synthesized using the RAFT technique forming a dithio end-capped using a dithiocarbonylthio group. See McCormick, ¶¶ [0011] - [0016], [0041]-[0042]. McCormick further teaches polymer-stabilized metal particles. See McCormick, ¶¶ [0090]-[0105]. McCormick further teaches that the particles are nanosized. See McCormick, ¶¶ [0076] - [0086]. The nanoparticle further contain metals that are nanosized and transmit visible light such as gold, silver, iridium metal. Thus McCormick anticipates claims 1-10.
